Herber Hose Program

Hose Services Guaranteed to Keep You Flying

Whether you are an industry giant or a smaller company on the way up, Herber will help keep your aircraft in the air. We guarantee fast and accurate hose assembly services to meet your responsibilities to the FAA and your customers. Our hose program lets you:

- Talk to a person who is working in real time to answer questions and get your order filled quickly;
- Send in your old hoses (just put them in a bag, we sort them, no part numbers required) to be exchanged for new ones with new fittings, or to be rebuilt with new hoses and use your existing, reusable fittings; or
- Call us with part numbers or a physical description of needed hoses and we'll expedite shipping;
- Take advantage of our 24-hour AOG service;
- Use our "red bag service" for priority air freight delivery.

Eaton Brand Certified

Herber Aircraft is the largest Eaton brand-approved shop for aerospace hoses. Certified by Eaton, we produce or rework all factory products including fuel, oil, hydraulic, and potable water assemblies. We also supply rubber and Teflon® hoses, fire sleeves, chafe guards, fittings, quick disconnect couplings, flanges, and clamps.

Herber is also your ground service specialist. We service ground support systems with starter hoses, hydraulic hoses and fittings, adapters and hose assemblies.

Herber is dedicated to providing the finest, fastest hose replacement and supply services for the aerospace and industrial markets. We offer a vast component inventory, same day turn around, unparalleled customer service, and we meet all Eaton and FAA requirements.

We're proud to offer products with the Herber name.

FAA/EASA-Approved Repair Station

Herber Aircraft Service is an FAA/EASA-approved repair station (GS3R538L/EASA.145.4526). Our repair station personnel are trained, certified and licensed. We have a full complement of Licensed Repairmen and Designated Manufacturing Inspections Representatives (DMIRs) on staff to insure the work is done to the highest standards and all required documentation and certification is provided. Tools and gauges are maintained and calibrated in accordance with ISO10012-1 (superseded MIL-STD-45662A) requirements and provide traceability to the National Institute of Standards and Technology.

Herber Aircraft, your best source for hoses
